(If required by PO)

23d. Sub- Task No.	23e. Sub-Task Description	*23f. Date	*23g. Status	23h. Outputs/Deliverables	*23i. Remarks
					NWIFC developed a
					communication/outreach plan for
					FY10, FY11, FY12, and FY13 that
		1.14.11, 7.12.11,		Communication/outreach	consisted of: (1) a transmittal note
1.1	Communication/outreach plan	6.22.12, 6.17.13	COMPLETED	plan	for the RFP; (2) a mailing

					distribution list that ensured that all eligible entities were notified equitably, timely, and thoroughly; and (3) a target date for releasing the RFP. Due to our previous interactions and current relationships with our member tribes, we had in place a Puget Sound Tribes distribution list that contained pertinent tribal contacts. We vetted this distribution list to ensure that the proper contacts are included and have continued to add to this distribution list as needed and requested. NWIFC developed the final FY10
					RFP through close consultation with the EPA, utilizing and editing the FY08 RFP to finalize the FY10's fundamental components and timeline. Additions to the FY10 RFP included: (1) language that fully described the intent of these funds; (2) requirements for all projects that collect environmental data to have a QAPP in place prior to data collection; and (3) logic model terminology. While we didn't include the traditional logic model table format, we utilized the logic model terminology to request specific outputs and outcomes per task.
					The FY10 RFP was then used as a template to develop subsequent fiscal year RFPs.
1.2	RFP development and distribution	1.25.11, 7.15.11, 6.22.12, 8.5.13	COMPLETED	Final RFP distributed	Additions to the FY11 RFP included: (1) adding PSP Ecosystem Recovery Targets as eligible activities under this

	award; (2) a request to describe
	how the potential impacts of
	climate change will be addressed
	in the planning and
	implementation of the
	subrecipient project; and (3)
	additional guidance regarding the
	information needed in the budget
	narrative, including a task
	delineated budget appendix.
	In consultation with the EPA
	Project Officer, we finalized the
	proposal review process and
	timeline.
	Additional to the EVAC DED.
	Additions to the FY12 RFP of
	note included: (1) clarifying
	language that delineated differences between subcontracts
	and professional services within
	the budget narrative section; and
	(2) adding a category within the
	narrative section that required an explanation of how technical
	review was going to occur for
	major techincal products of the
	subrecipient workplan. This provision on technical review was
	included to reflect and satisfy a
	new term and condition of
	NWIFC's contract that NWIFC
	and the EPA project officer
	collaboratively discussed and
	agreed upon.
	agreed upon.
	Additions to the FY13 RFP of
	note included: (1) notification and
	inclusion of a new riparian buffer
	on agricultural lands term and
	condition; and (2) a request for
	distinction between outputs that
	are tracked to monitor the
	progress of an award versus
	deliverables that are work
	products that will be provided to
	p. Saddle trial triil be provided to

	1			T	NWIFC before the close of the
					award.
					Ma diatributed the final DED for
					We distributed the final RFP for
					FY10 on 1.25.11, for FY11 on
					7.15.11, for FY12 on 6.22.12, and
					for FY13 on 8.5.13.
					NWIFC developed a coordination
					plan that can be executed
					throughout the project period and
					includes: (1) ensuring that the
					PSP is aware of the aims and
					activities of the subrecipient
					projects by enlisting them as a
					key reviewer of these subawards;
					(2) engaging the EPA Project
					Officer to discuss the capacity
					awards that the subrecipient
					projects are concurrently
					receiving, in order to avoid
					duplicative funding efforts; (3)
					engaging in existing processes
					and groups to disseminate and
					share subrecipient project
					information, including the ECB,
					the Leadership Council, the PSP
					Salmon Recovery Council, and
					the PSP/Federal/Tribal Caucus;
					(4) participating in LO meetings to
					ensure that other LOs are fully
					award of our subrecipient projects
					and vise versa; (5) an existing
					NWIFC website that is dedicated
					to information related to Puget
					Sound Partnership and Treaty
1.3	Coordination plan	1.31.11	COMPLETED	Coordination plan	Tribes of Western Washington.
1.0	Coordination plan	1.01.11		Coordination plan	Tribes of Western Washington.

23a. Work Plan Component/Task: 2. Award cycle

23b. Action Agenda Action(s) Addressed: D.3., NTA 3: Fund tribes to participate in the refinement and implementation of the Action Agenda, including salmon recovery plans.

HIGHLIGHTS/LESSONS LEARNED/REFLECTIONS

*25

(1) HIGHLIGHT: While all 21 subrecipient tribes are advancing projects that will and are substantially contributing to the restoration and protection of Puget Sound, we have chosen to highlight the progress of the following subreceipient projects. Additional tribal project accomplishments are in the process of being reported to NWIFC for this reporting period. Once NWIFC has reviewed and approved the next subrecipient FEATS reports, due to NWIFC on 4.30.16, they will be posted online to the PSP/NWIFC website (http://blogs.nwifc.org/psp/).

The Skokomish Tribal Nation completed implementing their third year of continued monitoring efforts focused on assessing the effectiveness of the Skokomish Estuary Restoration Program (SERP). These efforts include the continuation of monitoring changes to the nearshore habitat and beach surveys surrounding the restoration area. The project monitored: relative abundance, distribution, residence time, feeding behavior, and species diversity of salmonids and other fish species; colonization and succession of vegetation; sediment transport and estuarine mixing; and beach and shellfish composition. The 2016 sampling season

represents the first year of the developing response phase which will be compared to the initial response phase to determine effectiveness of habitat development over time.

The Snoqualmie have nearly fully completed their Rasmussen Creek fish barrier removal at Cherry Valley Dairy. This project has resulted in removal of several acres of invasive plant species, restored access for fish to upstream habitat, an installed cattle crossing, and acres of restored riparian areas with native plant and tree plantings.

The Nisqually Indian Tribe completed work on their Salish Sea marine survival study. The tribe joined efforts with the Long Live the Kings (LLTK) and other relevant entities to coordinate the Salish Sea Marine Survival Project, a massive research effort that brings together multidisciplinary expertise from over 20 Federal and State agencies, Tribes, academia and nonprofit organizations on both sides of the US/Canada border. The Nisqually carried out the zooplankton retrospective study to inform the development of a Puget Sound-wide zooplankton monitoring program.

(2) REFLECTION: The NWIFC hired on a new Puget Sound Recovery Projects Coordinator to manage these funds. We continue to enjoy and highly value our good working relationship with the EPA and our project officer. Continued and consistent funding for these high priority tribal projects is of the utmost importance to Puget Sound restoration and protection and we look forward to continuing to work with the EPA in current and future fiscal years in supporting our tribes and Puget Sound health.
